(1- Poor, 5- Excellent)

## Comments

<b>What were the best aspects</b>	<b>Other comments</b>	<b>Course/Seminar suggestions</b>
clear, precise, detailed info seminars		
Discussion of key issues	More discussion	
The Q/A panel and Interaction		
Health Canada explanations/definitions of regulations		
TPD	cookies/coffee/tes/doughnuts for break	CSA Standards/ UL Standards
The panel, Q&A time	Sometimes hard to hear	
the panel and interaction with the attendees		
discussion panel		
Examples		
Discussion panel helped clarify positions		
Very informative session; helped to enlighten my understanding of bureaucratic limitatons on data and info		How to build better partnerships between Clinical Engineering & Procurement in Healthcare
panel for questions		
I could not give an opinion - but that is not an oionion	Lawyers that could tell you what you CAN do	

---

**Comments**

<b>What were the best aspects</b>	<b>Other comments</b>	<b>Course/Seminar suggestions</b>
Panel discusson	Should improve audio equipment. Hard to hear the speeches	
Panel Discussion Questions & openess Legal issues regarding equipment donations Learned something valuable		CSA Standards
Discussion Panel	Michelle Bishop's - handout requires large font size in order to read information (too small, should be >8 font size)	More Biomedical related topics
Good current information Very informative		
Wide panel of expertise (legal and otherwise) Excellent round table @ end of session equipment donations	Larger font for Michelle's handout	another cbet review
